ABSTRACT

During the 1991-92 school year, 109 public school library book collections in Louisiana were surveyed to determine the average ages of volumes in various categories, including all Dewey decimal numbers. Results showed that the average age of books in Louisiana public school libraries was 23.51 years in 1992. The average age of the computerized sample was 20.17 years. The average age of books for elementary schools was 22.73 years. Elementary schools had the most recent professional collections, those with Dewey Decimal numbers in the 000-100s and 700s. The average age of books for middle or junior high schools was 24.56 years. These schools had the oldest reference and professional collections. High schools had the oldest overall collections, with an average age of 24.60 years per volume, but had the most recent reference collection of the three school levels. When respondents were asked to identify the Dewey classification "most important to keep up to date," 60% indicated the 500s, and the 600s ranked second at 11%. In the 500s, the area selected as being the most important to keep up to date, the average age was 24.61 years in 1992. A subset of the sample used a computer program to identify ages from entries with Library of Congress call numbers in 11 elementary schools. Seventeen figures illustrate general findings. Appendix 1, "Survey Forms," contains the original survey, directions for using the computer program, and the 5/93 refined survey. Appendix 2, "Results Report," consists of the letter to participating librarians and principals, sample of individual school results chart, and a blank form for individual school use. A third appendix offers results by individual school, arranged by level (elementary, middle/junior, and high school), then alphabetized within level by parish, then name of school. Contains 15 references. (Author/MAS)

LOUISIANA PUBLIC SCHOOL LIBRARY COLLECTION ASSESSMENT

Abstract

During the 1991-92 school year 109 public school library book collections in Louisiana were surveyed to determine the average ages of volumes in various categories, including all of the Dewey numbers. Results showed that **the average age of books in Louisiana public school libraries was 23.51 years in 1992**. In the 500 Dewey classification, the area selected by 60% of the respondents as being the most important to keep up-to-date in their particular collection, the average age was 24.61 years in 1992. A sub-set of the sample used a computer program written by Joe Ward of Follett Software Company to identify ages from entries with LC numbers in Circulation Plus files in eleven elementary schools. The average age of the computerized sample was 20.17 years, approximately two years newer than the average age of the non computerized sample from elementary schools. Investigators: Patsy H. Perritt, Professor, School of Library and Information Science, Louisiana State University, and Phyllis Heroy, Supervisor of School Libraries, East Baton Rouge Parish School System, Baton Rouge, LA.

Need for the Study

Funding for school library books in Louisiana, as well as in many other states, has never been sufficient to provide collections capable of satisfying a high percentage of student and teacher needs. State funds are the major source of funding for Louisiana public schools, including library books. In many poorer districts there is no local supplement. The highest state allocation for library books ever received in Louisiana was $5.10 in 1985-86. The next year the allotment dropped to $4.10 and the following year it plummeted to $2.68. With the rising costs of books, the purchasing power of school libraries was diminishing significantly. (Figure 1) In 1988, when a new administration took office, the state funding formula was changed and textbook and library funds were merged. This was disastrous for libraries in many parishes (districts/county). In some parishes there have been years when the entire allocation was designated for textbooks.

Unfortunately, Louisiana state standards for school libraries may have helped in creating a false image of adequacy by encouraging librarians to focus on numbers of books per pupil rather than the ability of the collection to support the curriculum and the needs of the students and staff. Standards adopted in 1990 retain a per pupil requirement and also include a quality approach. However, old habits are hard to break. Therefore, when principals and other administrators see libraries with shelves crammed with books and read reports of a high ratio of volumes per pupil, they might continue to assume that these are positive indicators of the effectiveness of the library collection.

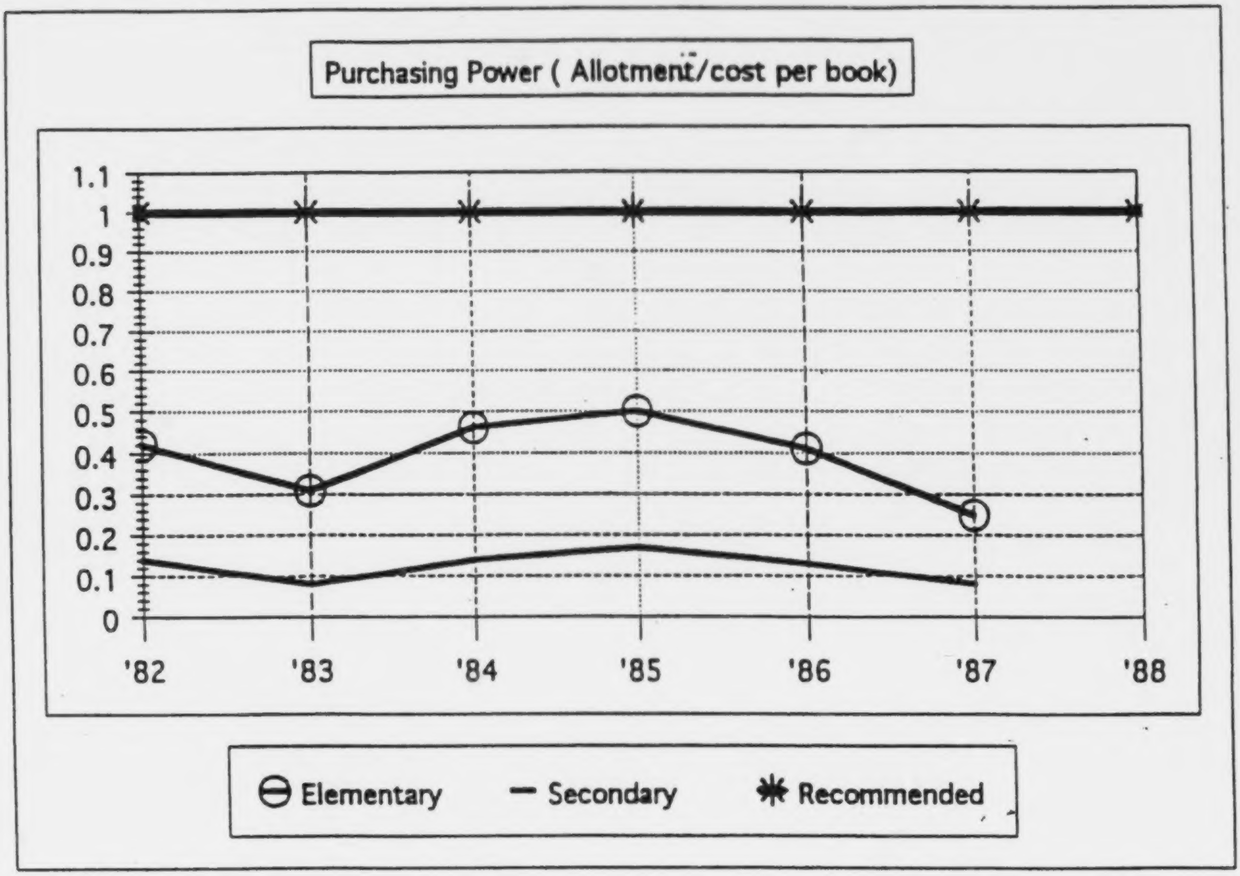
Many librarians were dismayed by the demise of funds for libraries and they turned to the Louisiana Library Association, Louisiana Association of School Librarians (LASL) for help. The LASL Executive Board responded by approving $100.00 to support a survey that would gather data concerning the state of school library collections. Patsy H. Perritt, Professor in the School of Library and Information Science at Louisiana State University, and Phyllis Heroy, Supervisor of School Libraries for the East Baton Rouge Parish Schools volunteered to conduct a statewide collection assessment to determine the currency of books in a sample of library collections from elementary, middle/junior high, and high schools. Since the age of a book is easily recognizable as a factor in determining the quality and usefulness of library books, the average age of a collection or components of a collection could be used to make a case for funding from the building level to the state level. Currency is also cited as a measure of adequacy in Information Power: Guidelines for School Library Media Programs (American Library Association/Association for Educational Communications and Technology, 1988). "Adequacy of the collection's size is best determined through an evaluation of how well the collection and the information services are meeting the needs of the users...An overriding concern must be for the recency of the information contained in the materials. The collection must include works by contemporary authors and producers and meet the interests and needs of today's students." (p. 72)

Objectives of the Study

1. To determine the average age of books in a sample of public school libraries of Louisiana
2. To identify the area of the collection the librarian deems the most important area to keep current in the school where they serve as library media specialist and to determine the average age of volumes in this area.
3. To compare the average age of books in selected elementary libraries with automated circulation to the average age of books in elementary libraries without automated circulation.

Figure 1

Louisiana Allotment & Book Prices



ALLOTMENT AND COSTS OF LIBRARY BOOKS BY YEAR

Year	Elementary	Allotment	Secondary
1982	$8.29	$3.49	$25.48
1983	$8.87	$2.72	$30.59
1984	$9.70	$4.49	$31.19
1985	$10.11	$5.10	$29.82
1986	$9.89	$4.10	$31.44
1987	$10.51	$2.68	$32.43
1988	$11.48	N/A	$35.35
1989	$11.79	N/A	$39.00

Note: Book prices from School Library Journal annual editorial on pricing trends, usually published in March.

Methodology

After investigating various methodologies of collection evaluation, it was decided to focus on only one aspect of total collection assessment, the age of books in a collection. Copyright date was selected as the data point, because dates and ages are easily understood by teachers, administrators, board members, etc. and copyright date is easily obtainable. The investigators accepted the fact that copyright date is not an absolute assurance of accuracy and currency, or usefulness, but accepted it as a reasonable estimation of accuracy, currency, and usefulness.

Since the investigators could not travel to each school, a simple methodology, which would not become a burden to those gathering the data, was devised. Every third book on the shelf was identified and the copyright date for that book was recorded on tally sheets labeled by the Dewey category 000-900s, plus fiction, biography, story collection, easy, Louisiana, professional, reference or encyclopedia. (Appendix 1) The completed tally sheets were then returned to the School of Library and Information Science, Louisiana State University, for tabulation.

Tallies were recorded in a spreadsheet using Claris Resolve. Ages and averages were computed and transported to a database, FileMaker Pro (Claris).

Variations in Methodology

1. Participants were allowed to select every tenth book in areas of the collection that had large numbers of books. Fiction and easy were the two areas most often identified as having large numbers of books. The decision to use every tenth book was made by individuals gathering the data within individual schools.

2. In one parish (Calcasieu), all librarians completed the assessment and in-service time for the data collection was provided. The instructions included the option to use the shelflist, if the librarians were reasonably sure of its accuracy.

3. In one parish (East Baton Rouge), eleven elementary schools used a computer program written by Joe Ward of Follett to identify all books with LC numbers from which the copyright date were drawn. This program ran with the data in "Circulation Plus". *Since this study, Follett has incorporated this feature into their circulation program.

School Selections

The schools participating were identified in several ways:

1. Volunteers were taken from members of the Executive Board of the Louisiana Association of School Librarians during the Fall 1991.

2. One member of LASL from each parish (county/district) was selected and mailed a survey in November/December 1991. These members were asked to participate or to locate another participant in the parish.

3. In parishes where there were no LASL members, the Louisiana School Directory was used to identify a school with a full time librarian.

4. Calcasieu Parish volunteered to conduct the survey system wide.

5. Elementary libraries selected to be a part of Phase I of the DeWitt Wallace-Readers Digest Library Power Project in East Baton Rouge Parish were required to complete the survey.

Surveys Returned and Used

A total of 118 survey reports were received, five of which were from non-public schools and four were incomplete. 109 reports from public schools were analyzed. This represents 7% of the 1460 public schools in Louisiana in 1992 Over 250,00 books were included in the sample.

Problems Encountered

Although a tally sheet was provided for each section (Dewey, Fiction, Easy, etc.) there were special collections that defied categorization i.e. "Red Flag", "Closed Stacks", "Careers", "Large Print" and numerous holidays. These unique categories were not used for age determination.

The sampling (five) of non-public schools was insignificant . Non-public schools were not included in the analyses.

The 000 and 100 classifications were reported together by a number of respondents. Because it was assumed that the 000 category had more volumes than the 100s, all the grouped responses (000 and 100s) were recorded as 000, therefore neither are pure data.

Biography posed several dilemmas. Respondents marked through 920 or 921 and wrote in "Biographies" or "92". Because it was assumed that most collections have more individual biographies than collective biographies, "Biographies" and "92" were recorded as 921.

Results

All Schools (Figure 2, Figure 3)
The average age of books in the collections surveyed was 23.51 years.

Elementary Schools (Figure 4, Figure 5)
The average age of books for elementary schools (those schools with kindergarten) was **22.73** years, almost one year (.78) below the overall average age, i.e. almost one year newer. The elementary schools had the most recent professional collections and 000-100s, as well as the 700s, of the three levels- elementary, middle/junior high and high schools.

Middle/Junior High Schools (Figure 6, Figure 7)
The average age of books for schools at the middle school or junior high school levels was **24.56**. Middle schools or junior high schools had the oldest reference and professional collections.

High Schools (Figure 8, Figure 9)
High schools had the oldest collections with the average age of **24.60** years per volume, including the oldest science and technology areas. Reference was the most recent of the three levels of schools.

Currency Preference

When respondents were asked to identify the classification "most important to keep up to date" in the particular school library, 60% indicated the 500s. The 600s ranked as second choice at 11%. (Figure 10)

In schools with kindergarten (elementary) the 500s were selected by 70% with Fiction second at 10%. (Figure 11)

In schools with grade 7 (middle/junior high) the 500s were selected by 48% with Fiction and the 600s at 13%. (Figure 12)

In schools with grade 12 (high schools) the 500s were selected by 41% with the 600s and the 800s at the rate of 17%. (Figure 13)

The average age of books in the 500s for all schools is 24.61 years, making if more than a year older than the average age for all classifications. When the overall ages in the 500s were compared to the ages for collections in which 500 was selected as the most important area to keep current, elementary schools were consistent with the overall average age of the 500s of about 23 years and middle/junior high schools were consistent with the average age of about 25 years. In high schools where the 500s were identified as the most important area to keep current, the average age of the 500s was 24.8 years, while the average age for the 500s in all high schools was 25.83, indicating about one year difference, or one year newer. (Figure 14)

Computerized and Non Computerized Results (Figure 15, Figure 16)

The average age of the elementary school samples calculated by the Follett circulation system enhancement was 20.17 years, approximately two years lower than the average age on the samples taken from the library shelves or from the shelflist cards.

Computerized and Non Computerized Samples - Elementary Schools

Figure 16

]

Implications

1. Collections at all levels are in need of updating.
2. The inadequacy in science and technology is at a crisis level.
3. Resource based teaching and learning are hindered with the current age of library book collections.
4. Outdated collections are not meeting the diverse personal needs of students in the 1900's and do not provide the highly motivational materials needed by reluctant readers.
5. Louisiana public school libraries do not have the current book resources to prepare students to become effective users of information, successful problem solvers, critical thinkers, or effective communicators.
6. Strategies must be developed to provide access to current information to Louisiana public school students and staff.

Dissemination of Results

Each school librarian who participated in the assessment received a copy of the results for their school and a statewide summary. (Appendix 2, Appendix 3 for individual school results) The librarians were urged to share the results with local and state officials, parents, and colleagues.

The complete assessment survey report was placed in the collections of the Louisiana State Library, the library of the Louisiana State Department of Education, and the Middleton Libraries (Library and Information Science Library) of Louisiana State University. A copy of the report was sent to ERIC and to the Louisiana Library Association.

Preliminary results of the assessment were shared with a Joint Legislative Committee of the Louisiana Legislature at a Special Legislative Hearing on Libraries on January 2, 1992 by Phyllis Heroy.

The results were presented at a session of the Sixth National Conference of the American Association of School Librarians in Baltimore, MD on October 24, 1992 by Patsy H. Perritt and Phyllis Heroy. The program was entitled "Enhancing Information Access Through Collection Analysis".

The survey results were requested by Eileen D. Cooke and sent to the Washington office of the American Library Association for documentation in support of ESEA reauthorization legislation on November 4, 1992.

The results were presented at a session of the Louisiana Library Association annual conference in Shreveport, LA March 26, 1993 by Phyllis Heroy.

LASL A Section of LLA Louisiana Library Association
Louisiana Association of School Librarians

November 15, 1991

Dear Librarian,

As you are aware, school libraries have been severely impacted by the changes in the state Minimum Foundation Program, which eliminated line item funding for library books. The Louisiana Association of School Librarians is very concerned about the situation. There are some parishes in which no funds have been allotted to libraries; in other cases, allotments have been reduced drastically.

Although the legislature addressed this issue in 1991 by mandating that $2.70 per pupil must be spent for libraries in each parish (H.B. #260), this affects only the 1991-92 school year.

A case must be made for dedicated funding. We think that can best be done by presenting the results of a state-wide assessment evaluating the age of collections in libraries. We are asking for your cooperation in completing the enclosed assessment and returning it as requested. By helping us you will be helping yourself and school library programs throughout our state.

Sincerely,

Phyllis Heroy
Phyllis Heroy

Patsy Perritt
Patsy Perritt

****

SPECIAL NOTE TO LIBRARIANS RECEIVING THIS MAILING

You are receiving this mailing either because you have been identified as an LASL member or as a representative librarian from a parish with no known LASL member.

We hope you will agree with us that a stable source for State funding is a must for school libraries to survive and fulfill their educational mission. If for any reason you are unable to participate personally in this survey, please ask another librarian in your parish to participate. We would like to have results from at least one school from each parish in the state. If you can get other librarians in your parish to participate in addition to yourself, please do so.

Thanks for your help!

PROFESSIONAL COLLECTION

____________ **Total number of professional volumes (on 1990-91 report or actual count by evaluator)**

____________ **Number of professional periodical subscriptions**

LOUISIANA SCHOOL LIBRARIES

COLLECTION ASSESSMENT

CURRENCY

Method:

Non-fiction books are assessed by selecting a range of Dewey numbers by 100's. Fiction books are assessed as one area A-Z. Easy books are also assessed as one area. Special collections, such as Louisiana, may be assessed separately.

A sample is selected by identifying every tenth book on the shelf or each third book and recording the latest copyright date of the volume.

For the area/Dewey number identified to be the most important to keep up-to-date, use every third book. If the range, e.g. the 200's, is so small that just a few dates would be recorded using every tenth book, elect to sample every third book.

General Directions:

Make copies of the work sheet provided. See page 4 for the number of pages needed. Keep one blank copy to use if additional copies are needed. At the top of the work sheet write in the range of numbers or name of the section being sampled, for example, 800-900, Fiction, Easy, Louisiana Special Collection. Indicate whether every tenth book or every third book was sampled for each area by checking the appropriate item at the top of each work sheet.

A team of two people is recommended. One person will pull books from the shelf and call out the copyright date and the other will place a tally mark on the work sheet by the year and cumulate by fives (   ).

The copyright date is generally on the verso (back) of the title page. In rare cases it is in other places, such as in the back of the book. Use the latest copyright date if more than one date appears. Be sure to use only copyright dates -- not edition or printing dates. If no copyright date can be found, just skip the volume.

If the shelflist is accurate through the May 1991 inventory, the sampling can be done by using the cards in the same manner as actually looking at the volumes. If the accuracy of the shelflist cannot be determined, go to the books on the shelves for the sampling.

Questions to: Phyllis Heroy **(504 295-8612)** or Patsy Perritt **(504 388-1460)**

Return all forms by January 1, 1992 to:

AVERAGE COPYRIGHT DATES BY SECTION

The research team will average the copyright dates to complete this sheet. This page is included to indicate the sections to be assessed. A separate tally sheet should be completed for each area.

Averages are based on a sampling of each tenth book, except in the area/Dewey number identified as the most important to keep up to date, in which case every third book will be sampled. If any section is judged to be small, use every third book.

Memo to: Librarians -- Library Power Phase III Schools

From: Phyllis Heroy, Supervisor PH

Subject: Collection Assessment

The enclosed disk and instructions are to use in doing your Collection Assessment. The program on the disk has been written to use the Export Data feature of the Circulation Plus program which allows you to copy selected records to a floppy disk. For this survey, you will be checking major divisions of the Dewey sections, biography, reference, easy, fiction and special sections -- Louisiana, for example.

The enclosed CPYDTE program will locate the Library of Congress number and extract the first two digits, representing the year of publication. The program will check the records and count the number of titles for each year. These will be saved to a floppy disk. A report for each section can then be printed. The printout will show the number of books for each copyright year. At the end of the print out, the total number of books in the section and the average copyright date for that section will appear.

This information should be very useful to you in collection development as you analyze your present collection in relation to the curriculum and current needs and interests of students, teachers and parents. This data will also be required as part of the Library Power Project evaluation by the Dewitt Wallace-Reader's Digest Fund.

After finishing the printouts, fill in the information of page 4. Make one copy to keep on file and send one copy to the Library Power Office, Central Office Annex, Attention: Dr. Evelyn Conerly. Keep the original printouts in your files in case any question should arise regarding your data.

If you have any questions regarding use of the program, call the Library Services Department, 295-8610.

cc: Evelyn Conerly
Jenola Duke

COPYRIGHT DATE PROGRAM

IMPORTANT: DO NOT CALL FOLLETT SUPPORT ON THIS PROGRAM!

INSTRUCTIONS: Read the steps below carefully before beginning.

Although the Copyright Date (CPYDTE.EXE) disk may be used from drive C (the hard drive) I recommend working from the program disk in drive A and placing your collection data on data disks you create.

Format and label 2 - 3 blank disks to use to store the data.

The page numbers in parentheses refer to pages in the Circulation Plus manual.

Before beginning this program, print out a monthly Dewey report by 100's.

DIRECTIONS

Boot to the Circulation Plus menu

Go to the Master Menu

Select # 5 - Export Item/Patron Data (page 333)
Following menu prompts, do the following steps:

Select # 1 - Bibilographic records (p.335)
Select # 1 - All records (p.336)
Select # 1 - Microlif format (p.337)
Select # 3 - Call number order (search key- p.338 &341)

Important Note: The call number range must be within the same Dewey section. For example, 100 - 199. If you put in the beginning number for that range, 100, for example and press Enter, the computer will find and display the first 100 call number. Press Enter again to accept this as the beginning number. To get the last number, put in 200, and it will display the first two hundred call number. Use the up arrow key to scroll back to the last call number in the 100's range. When that number is displayed, press Enter to accept. You will be asked if these are correct. Answer "Y" if they are: if not, make the correction needed.

The MARC tags menu will appear next.
Select # 1 - Records with Local Copy Information (p.344)

BEST COPY AVAILABLE

Select File Name - Type in the number of the Dewey class you are working with - 100, for example.

Place a formatted data disk in the selected disk drive -- a: or b: (p. 345). The computer will display the default disk drive. If it is not correct, correct it, and then press Enter.

After the records have been recorded on the data disk, the Search Key menu will appear again. To Export the next section, select # 3 - Call number order again and proceed with the next section.

After all sections have been exported to disk, you are ready to print out results.

Press Esc several times to get back to the Main Menu.
Select E to Exit to DOS.

Be sure the printer is on and set at the top of a page.

Remove the data disk and insert the CPYDTE.EXE program disk in the A: drive (or B:).

At the C> type

A:CPYDTE (Note: If for some reason you are using your B drive, type B:CPYDTE.

Press Enter

A message will state the fields in your records from which the copyright information will be taken.

The screen will ask: File name to count?

Remove the CPYDTE program disk

Insert the data disk

Type in the file name for the first section according the this format:

`A:100.LIF`

PLEASE NOTE: You must place the data disk in the disk drive before typing this command or the program will not work! This command tells it the file is in the A: drive, the file name is "100" and it is in Microlif format. Be sure to follow exactly the format as given.

The computer should begin counting bar code numbers and printing data by copyright years. The report will be printed on two pages.

At the end, the total number of books in the section and the average copyright year will be printed.

Continue this process until all sections have been printed.

Note: You can compare the total barcodes printed in each section with the totals given in the Dewey report you printed. THEY WILL NOT MATCH EXACTLY BUT SHOULD BE SOMEWHAT CLOSE. Discrepancies will occur because, for example, records with no Library of Congress number or copyright year will be omitted during the counting.

OPTIONAL:

If you want to verify statistics on a section, you can get a printout of the MARC records by getting to a C: and typing in

```
TYPE A:700.LIF >PRN
```

Be sure to space after the word "type" and "LIF".
All the MARC records for that section will be printed and you can hand check to verify the computer data.

If you want to print the MARC records to the screen instead of the printer, type

```
TYPE B: 100.LIF
```

Use your CTRL/Break or CTRL/Pause keys to control the scrolling.

Memo to: Librarians

From: Phyllis Heroy PH

Subject: Collection Assessment

The enclosed instructions are to be used in doing a Collection Assessment of your library books. For the assessment, you will be checking copyright dates of books in all sections of the collection -- non-fiction, fiction, easy, reference, biography, professional and special collections (Louisiana, for example.)

Results of the assessment will be very useful to you in collection development as you analyze your present collection in relation to the curriculum and current needs of students, teachers and parents. This information will be needed for the evaluation of the Library Power Project by the Dewitt Wallace-Reader's Digest Fund.

After completing the collection assessment as instructed, the tally sheets should be returned to the Library Power Office, Central Office Annex, Attention: Dr. Evelyn Conerly.

If you need help in doing the assessment call the Library Power Office, 922-5497.

If you have any questions regarding procedures call me at 295-8610.

cc: Evelyn Conerly
    Jenola Duke

LIBRARY POWER

COLLECTION ASSESSMENT

METHOD:

Non-fiction books are assessed by selecting a range of Dewey numbers by 100's. Fiction books are assessed as one area, A-Z. Easy books are assessed as one area, A-Z. Special collections, such as Louisiana, may be assessed separately.

A sample is selected by identifying every tenth book on the shelf in large sections and every third book in small sections. For example, the 300's and 500's in a typical library would represent a large section; the 100's and 200's would represent a small section. As a rule of thumb, if the section contains fewer than one hundred books, sample every third book.

For the area or Dewey range the librarian identified as the most important to keep up-to-date, use every third book, regardless of the number of books in that range.

GENERAL DIRECTIONS

Make copies of the tally sheet provided. A separate tally sheet is needed for each section to be sampled. See page 4 to figure the number of copies needed. Keep one blank copy to use if additional copies are needed. At the top of the tally sheet write in the range of numbers or name of the section being sampled, for example, 500, Easy, etc. Indicate whether every tenth book or every third book was sampled for each area by checking the appropriate item at the top of the page.

A team of two people is recommended. One person will pull the books from the shelf and call out the copyright dates and the other will place a tally mark on the tally sheet by the year and cumulate by five's (𝍸).

The copyright date is generally on the verso (back) of the title page. In rare cases it is in other places, such as the back of the book. Use the latest copyright date if more than one date appears. Be sure to use only copyright dates -- not edition or printing dates. If no copyright date can be found, skip the volume and go to the next book on the shelf.

If there are any questions about procedures, call Phyllis Heroy, 295-8610.

APPENDIX 2

Results Report

Letter to Librarian and Principal p. 42

Sample of Individual School Results Chart p. 43

Blank Form for Individual School Use p. 44

March 18, 1993

Dear Librarian and Principal:

The participation of your school library in the 1991-92 statewide, public school library collection assessment conducted under the auspices of the Louisiana Association of School Librarians has resulted in significant data for your school, the school system, the state, and the field of school librarianship.

The overall results of this survey were reported at the national conference of the American Association of School Librarians in October 1992 and have subsequently been used as support data for the ESEA reauthorization campaign in Washington, D.C. In January of 1992 tentative results were used in a Louisiana joint House-Senate legislative hearing on libraries.

As you are aware, funding for the purchase of books and materials for school libraries in Louisiana continues to be in a perilous position. Allocations from the state are lumped with textbook funds and are discretionary. The purchasing power of the dollars which are spent for library materials continues to be eroded. According to the March 1993 School Library Journal, the **average cost per volume** at the preschool - grade 6 level is **$14.65** and junior high and up level is **$15.12**. These averages do not include general reference materials, which are typically expensive and can cost $20-$50 or more per volume.

Results of this survey from 109 schools show that the **average age of books in Louisiana public school libraries is 23.51 years**. Perhaps even more disturbing is the average age of books in the areas of natural sciences and math (24.16 years) and technology, including applied sciences (21.79 years).

The **age data for your school library collection** are appended. A complete report of the findings will be available in the collections of the Louisiana State Library and the LSU School of Library and Information Science Library and in the office of the Louisiana Association of School Librarians. Please contact Patsy Perritt, Professor, School of Library and Information Science, 267 Coates Hall, LSU, Baton Rouge, LA 70803 if you have specific questions about your data or if you wish to purchase a copy of the report. A limited number of copies will be available at $5.00 each.

It is anticipated that you will use this information in a variety of settings to gain support for your school library. A **blank chart is provided** so that you may duplicate it and tailor it to the specifics of your school, selecting the comparisons you feel will be the most beneficial to your situation. It would be helpful to other librarians and educators if you would let us know how the information is used. A phone call or note to me would be appreciated.

Thank you again for the time and effort invested in the gathering of the data.

Sincerely,

Patsy H. Perritt
Professor
